Curriculum Vitae

Overview

I am an ethnographer with over eight years of experience who is trained in software engineering and project management. I study the collaborative work practices of expert stakeholders (domain and data scientists) creating and using ecosystems/infrastructures of software and data. My research supports the design of practices, products, and policies by collecting data using interviews, surveys, observations, and artifacts.

Education

University of Washington Seattle, WA
Doctor of Philosophy, *Human Centered Design & Engineering (HCDE)* Sept 2010 - Aug 2016
Advised by Dr. Charlotte P. Lee

University of Washington Seattle, WA
Master of Science, Human Centered Design & Engineering (HCDE) Sept 2010 - Mar 2012

Rose-Hulman Institute of Technology Terre Haute, IN
Bachelor of Science, Software Engineering cum laude Aug 2006 - May 2010
Minor in Economics

Professional Experience

Research Experience

Computer Science Post-Doctoral Researcher

Data Science & Technology Department, Usable Software Systems Group

Lawrence Berkeley National Laboratory

Berkeley, CA Aug 2017 - Present

- Conducted ethnographic and user research of scientific software ecosystems to produce insights for designing products used in high performance computing environments
- Designed and conducted ethnographic inquiry of scientific data change to better characterize cultures around the materials of knowledge production in different disciplines
- Designed and conducted usability tests of alpha version of a scientific data change calculation tool to inform the direction of the tool & overarching project
- Providing UX consulting to other Berkeley Lab and affiliated science teams to evaluate workshops, products, etc. as needed for areas to improve

Post-Doctoral Research Associate & Laboratory Manager

Computer Supported Collaboration Laboratory

Seattle, WA Oct 2016 - July 2017

- Conducted qualitative data analyses using interview, survey, and artifact data for three NSF-funded projects on scientific collaboration and software development
- Mentored an undergraduate & two doctoral students in qualitative data analysis and manuscript writing while managing general laboratory business including all IRBs
- Co-authored three National Science Foundation grant proposals, including developing research aims, literature reviews, study designs, and broader impacts

DREW PAINE

url <https://drewpaine.net>
e-mail drew@drewpaine.net
e-mail pained@lbl.gov

Graduate Research Assistant & Laboratory Manager Computer Supported Collaboration Laboratory

Seattle, WA

Sept 2010 - Sept 2016

- Studied the software development practices of scientists working with big data & cyberinfrastructure, seeking to better explain how individuals without formal software training develop software infrastructures and ecosystems to meet their research goals.
- Designed and led day-to-day activities for two longitudinal National Science Foundation funded projects for over 5 years
- Conducted qualitative data collection and analysis on three additional projects including the development of cyberinfrastructure middleware software, educational outreach in cyberinfrastructure projects, and coordination centers in cancer epidemiology involving surveys, interviews, observations, and artifacts
- As CSC Laboratory Manager I:
 - Managed Institutional Review Board (IRB) human subjects processes including applications, annual reports, and closures
 - Wrote National Science Foundation project reports & grant proposals
 - Mentored graduate and undergraduate students

Graduate Research Assistant Laboratory for Human-Centered Engineering Education (LHCEE)

Seattle, WA

June 2011 - June 2015

- Worked with Dr. Jennifer Turns on an interdisciplinary team conducting the “Implications for Practice” research study to characterize how research findings are being presented as actions for educational practice in engineering education
- Facilitated multiple rounds of qualitative data production and document analysis of a selected literature
- Co-authored multiple publications and a procedure for translating research findings to educational practice (A5, A4, A2, & C3, below)

Teaching Experience

Teaching Assistant, Human Centered Design & Engineering

Seattle, WA

Mar 2012 - June 2012

- Served as teaching assistant for HCDE 502 ‘Empirical Traditions’ Professional Masters course with Dr. Jennifer Turns with 25 students
- Helped re-design the course to enable students to examine and digest different forms of empirical research and examine the implications for practice from published academic research
- Designed and helped grade assignments, as well as provided students with feedback during class discussions

DREW PAINE

url <https://drewpaine.net>
e-mail drew@drewpaine.net
e-mail pained@lbl.gov

Lab Instructor, University of Washington College of Engineering STEM Bridge Program

Seattle, WA

August 2012

- Taught four incoming freshman engineering students from minority & underrepresented populations about human-centered design and qualitative research over seven half-day sessions
- Designed curriculum, lectured, and mentored students in field observations, interviewing, qualitative data analysis, and rapid prototyping for a mobile app project
- Facilitated their interaction with stakeholders from Museology, UX industry, and the Henry Art Gallery

Undergraduate Software Engineering & Project Management Experience

Intern Project Manager, Rose-Hulman Ventures

Terre Haute, IN

Feb 2010 - May 2010

- Assisted a Senior Project Manager and other senior management developing design prototypes to better position Rose-Hulman Ventures on the web
- Developed and delivered a functioning prototype website for evaluation by staff and management using PHP and web standards while supervising & collaborating with a freshman software engineering intern

Intern Project Manager, Rose-Hulman Ventures

Terre Haute, IN

Feb 2009 - Feb 2010

- Contracted by an external vendor with feature enhancement of a major tax assessment and records storage solution used by counties in the State of Indiana
- Executed multiple feature enhancements, culminating in a major version revision and successful certification of the new version by the State of Indiana
- Led the design and integration of new features required by the client in the Java/Apache Tomcat based system
- Managed client relations, scheduling and prioritization of project tasks, and completing feature implementation tasks
- Managed five Junior and Senior level student interns

College Student Technical Senior, Lockheed Martin Maritime Systems & Sensors

Manassas, VA

May 2008 - Aug 2008

- Performed new feature integration and testing across multiple product lines as member of the Systems Integration & Test team within Undersea Systems
- Implemented feature requests and bug fixes in support of feature testing and build release on enterprise Linux systems in a Java & C++ (primarily Java focused) environment
- Executed multiple features & bug fixes in advance of a major build release to the client while participating on an intern team building an ocean thermal energy conversion demonstration testbed that was presented to executive management

Note: A U.S. Secret clearance was required & obtained for this job

Invited Talks and Guest Lectures

I6 — 2017-12-15. Invited Speaker. “*Sociotechnical Investigations of Scientific Software, Collaboration, & Infrastructure*.” Hosted by Frédéric Suter at IN2P3’s Computing Centre (or CC-IN2P3). Lyon, France.

I5 — 2017-12-12. Invited Speaker. “*Sociotechnical Investigations of Scientific Software, Collaboration, & Infrastructure*.” Hosted by Christine Morin & the Myriads Team at Inria Rennes – Bretagne Atlantique. Rennes, France.

I4 — 2017-05-25. Invited Speaker. “*Sociotechnical Investigations of Scientific Software, Collaboration, & Infrastructure*.” Data Science & Technology Department, Lawrence Berkeley National Laboratory.

I3 — 2017-04-13. Invited Speaker. “*Using & Creating Theories When Studying Scientific Collaboration*.” Brook Sattler’s HCDE501 Masters Theory course.

I2 — 2017-04-12. Guest Lecturer. *Interviewing in Qualitative Research*. Charlotte Lee’s HCDE545 PhD Qualitative Methods course.

I1 — 2017-04-04. Discussant. *Cosmology Software & Infrastructure*. Megan Finn’s INF598 Information Infrastructure Studies special topics course.

Academic Service

- Big Data & Society Journal, article reviewer
- iConference 2019, paper reviewer
- Ongoing Journal of Computer Supported Cooperative Work (JCSCW), article reviewer
- ACM CHI 2013, 2014, and 2017 Conference, paper reviewer
- ACM CSCW 2015, '2018 Online First' Conference, paper reviewer
- Human Centered Design & Engineering Professorial Hiring Committee member, 2011-2012
- ACM CSCW 2012 Conference, Student Volunteer Day Captain

Awards and Honor Societies

- *Sept 2012 - June 2013* University of Washington College of Engineering Dean's Fellowship
- *Sept 2011 - Mar 2012* Human Centered Design & Engineering Professorial Hiring Committee
- *Nov 2009 - May 2010* Chair of Outreach Committee for *Indiana Alpha Chapter Upsilon Pi Epsilon*
- *Oct 2009* inducted to *Indiana Alpha Chapter of Upsilon Pi Epsilon* Computer Science Honor Society
- *Oct 2009* received IEEE Certified Software Development Associate (CSDA) certification
